PROFESSIONAL SUMMARY

Backend-focused Computer Engineering student skilled in Spring Boot, REST APIs, JWT authentication, and MySQL. Built real-world projects including an RBAC system, RAG-based document Q&A platform, and scalable backend APIs. Actively seeking internship or entry-level backend developer roles.

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript

Frameworks & Libraries: React, FastAPI, Spring, Spring Boot

Databases & Cloud: MySQL, SQL, MongoDB, PostgreSQL

Tools : Git, GitHub, Postman, Swagger

PROJECTS

JIRA-Style Task Management System | [GitHub](#)

- Built a microservice-based project management platform with Spring Boot backend and React frontend.
- Implemented user authentication, project creation, task workflows, status tracking, and role-based access.
- Designed RESTful APIs for task assignment, progress updates, and real-time collaboration features.
- Structured backend for scalability with separated services and centralized API handling.

RAG Based Document Q&A System | [GitHub](#)

- Built AI-powered document question-answering system using Retrieval-Augmented Generation (RAG).
- Implemented document upload, text chunking, embedding generation, and vector-based semantic search.
- Developed backend APIs for query handling, history tracking, and authentication.
- Improved information retrieval accuracy using embedding similarity and context-aware responses.

Role-Based Access Control (RBAC) System | [GitHub](#)

- Developed secure authentication and authorization system using Spring Boot, JWT, and MySQL.
- Implemented role-permission mapping with dynamic access control for protected APIs.
- Built admin dashboard for managing users, roles, and permission assignments.
- Ensured secure session handling and token-based authorization across services.

EXPERIENCE

Frontend Developer Intern | Omega Soft

- Developed responsive web interfaces for a Housing Management System using HTML, CSS, and JavaScript
- Implemented core modules including property listings, tenant management, and rent tracking dashboards.
- Added dynamic client-side functionality with JavaScript to improve user interaction and form handling.
- Ensured cross-browser compatibility and mobile responsiveness across all application screens.
- Collaborated with backend developers to integrate APIs and ensure seamless data flow.
- Learned and applied React.js fundamentals to modernize UI components and improve frontend structure.

EDUCATION & CERTIFICATIONS 2022 – 2026

- BACHELOR'S DEGREE | Computer Engineering | MES Wadia College, Pune

2022– 2026
